SUMMARY

Passionate learner, full stack developer and zealous tech admirer. I design and create wonderful works of technological art. I add value wherever I go with my passion, energy and dedication to my craft. My lifelong goal is to give back to the world with my skills by inspiring others with my art and teaching others to be masters of their profession. I love to work in teams because I believe the greatest things in life are achieved when we are a collective.

EXPERIENCE

Sales Associate, Wireless Nerds

Toronto, ON - 2012-2016

Accomplished business analyst at Wireless Nerds. I managed the company website and handled technical issues with the products. My primary responsibility was sales and client management.

Accomplishments

- Responsible for almost half of total company sales.
- Maintained the product warranty center (repair and technical issues)
- Helped design and maintain company website.
- Managed numerous client accounts.

Volunteer, Open Source, Toronto Mesh

Toronto, ON - 2016 - present

Co-developed and designed the tomesh.net website. It is a volunteer position for a grassroots organization that is building a mesh network for Toronto. The team consists of 11 people.

EDUCATION

Ryerson University -
Bachelor's of Commerce,
Information Technology
Major, 2016

George Brown - Business
administration, Marketing
Major, 2011
